

Ideation Phase Empathize & Discover

Date	31 March 2026
Team ID	SWTID-2026-4754
Project Name	Automating Employee Data
Maximum Marks	4 Marks

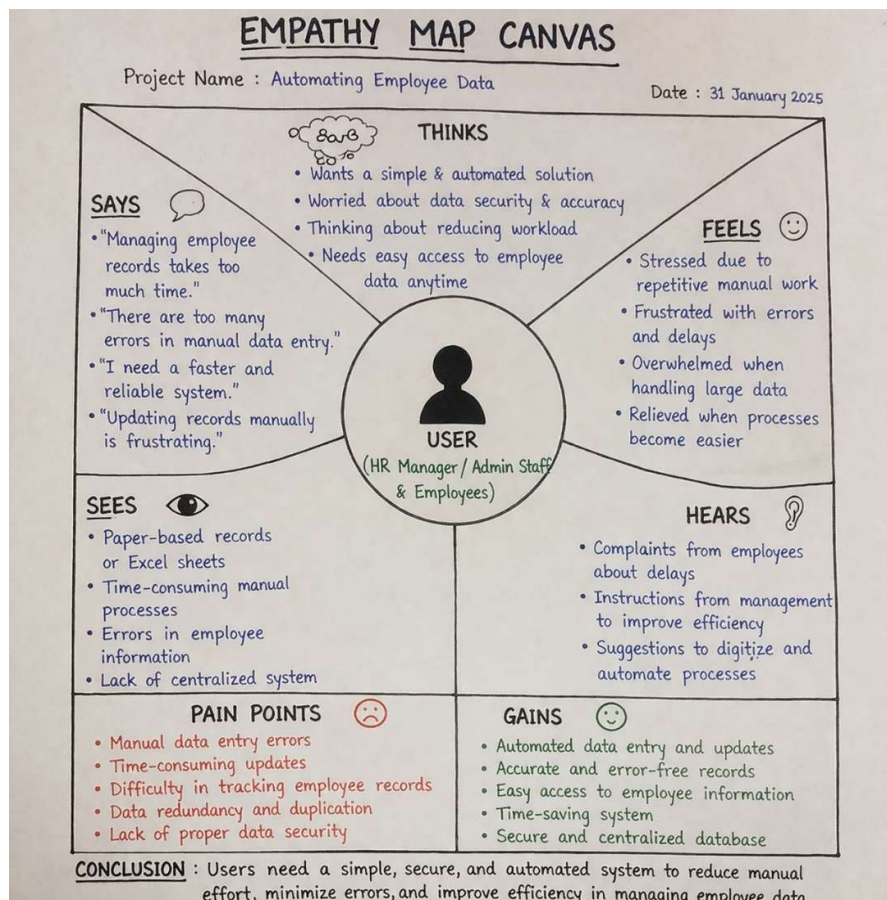

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

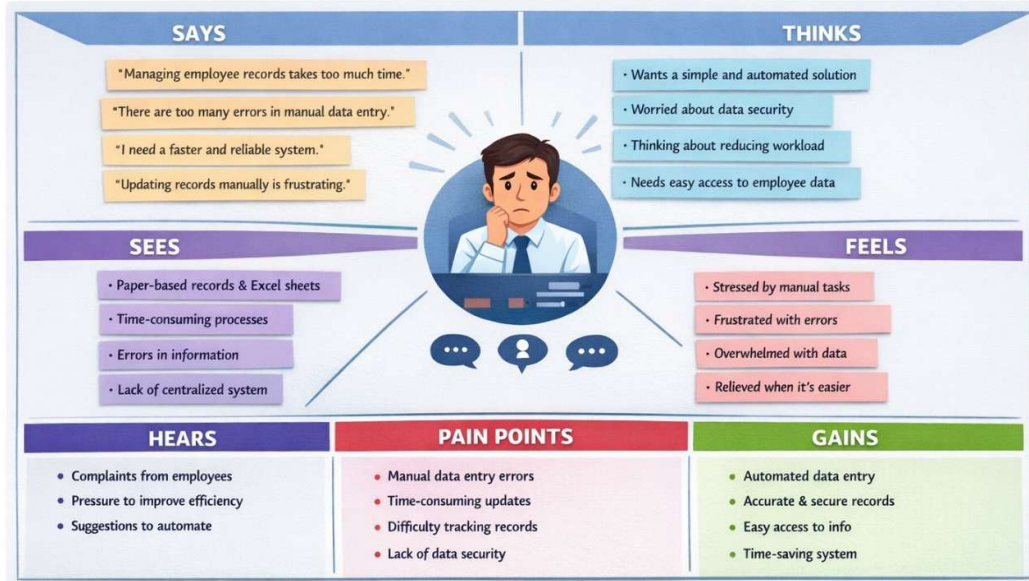

Example :

Empathy Map Canvas

Project Name: Automating Employee Data

Date: 31 January 2025

Reference: <https://www.mural.co/templates/empathy-map-canvas>

User (Who are we empathizing with?)

- HR Manager / Admin Staff
- Employees who submit and update their data

Says (What does the user say?)

- "Managing employee records takes too much time."
- "There are too many errors in manual data entry."
- "I need a faster and reliable system."
- "Updating records manually is frustrating."

Thinks (What does the user think?)

- Wants a simple and automated solution
- Worried about data security and accuracy
- Thinking about reducing workload
- Needs easy access to employee data anytime

Feels (What does the user feel?)

- Stressed due to repetitive manual work
- Frustrated with errors and delays
- Overwhelmed when handling large data
- Relieved when processes become easier

Sees (What does the user see?)

- Paper-based records or Excel sheets
- Time-consuming manual processes
- Errors in employee information
- Lack of centralized system

Hears (What does the user hear?)

- Complaints from employees about delays
- Instructions from management to improve efficiency
- Suggestions to digitize and automate processes

Pain Points (Challenges faced)

- Manual data entry errors
- Time-consuming updates
- Difficulty in tracking employee records

- Data redundancy and duplication
- Lack of proper data security

Gains (User Needs & Goals)

- Automated data entry and updates
- Accurate and error-free records
- Easy access to employee information
- Time-saving system

Conclusion

The empathy map shows that users need a **simple, secure, and automated system** to reduce manual effort, minimize errors, and improve efficiency in managing employee data .
